

Careers in Medicine

Careers in Medicine® (CiM) supports medical students in their career-planning and the faculty and staff who advise them.

CiM provides a variety of information and tools to help medical students choose a specialty, get into residency, and plan their physician career. But CiM also helps you hone your advising skills and maintain current expertise around specialty choice issues to build rapport with students and develop meaningful advising relationships.

The CiM Web site provides you and your students

- s descriptions of and data for more than 120 specialties,
- s career assessments to help connect students to specialty options that best t,
- s a list of clinical and research opportunities,
